

Server Information

The Server Information Window displays details of the server and the current connection.

To open the Server Information window select, from the main menu, File → Server Information.

Server Information Window

The screenshot shows a window titled "Server Information" with a close button in the top right corner. Below the title bar is a decorative graphic of a blue globe with a network cable plugged into it. The window is divided into four main sections:

- Server Details:** A table with three rows: Owner (GazillaByte), Description (Production), and Version (Monday, June 15, 2020 - 16:31:16).
- Server Runtime Details:** A table with four rows: Process-ID (1580), Current Time (Thursday, July 02, 2020 - 12:07:24), Start Time (Monday, June 29, 2020 - 14:58:27), and Uptime (2 Days, 21 hours, 8 minutes 57 seconds).
- Current User Information:** A table with three rows: User-ID (tapemaster), User Name (Super User), and User E-Mail (empty).
- Server Details:** A table showing connection statistics. It includes "Requests" (72), "Bytes Sent" (11,924), and "Bytes Received" (2,112). To the right, there are two progress bars: the top one is labeled "Compression" and shows 69,184 bytes with a green bar; the bottom one shows 569 bytes with a green bar.

An "OK" button is located at the bottom right of the window.

There are four different panels in the **Server Information Window**:
