2025/05/08 10:10 1/1 fi

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME.*.*. Using FI: to refer to a file for an attribute value works for all attributes.
