

# Command Line Utilities

The TapeTrack Command Line Utilities provide a large range of automation and reporting functionality and have been ported to the following platforms:

1. AIX
2. HPUX
3. IBMi
4. Linux (Intel and ARM)
5. Solaris (SPARC and Intel)
6. Windows
7. zOS

While most utilities are available for Linux and Windows, other platforms only support a subset of the full command suite.

## Automation Utilities

Command	Description
<a href="#">TMSS10AssignContainer</a>	Assigns <a href="#">Volumes</a> to Container/s.
<a href="#">TMSS10BatchLoader</a>	Creates <a href="#">Customer</a> , <a href="#">Media</a> and <a href="#">Repositories</a> from a configuration file
<a href="#">TMSS10BatchSlotAllocation</a>	Export and Import Slot Allocation information
<a href="#">TMSS10BillingMergeElements</a>	Merges TapeTrack billing file elements.
<a href="#">TMSS10Catalog_NBU</a>	Creates Catalog entries from NetBackup output.
<a href="#">TMSS10Catalog_Networker</a>	Creates Catalog entries from Networker output.
<a href="#">TMSS10Confirm</a>	Confirms selected tapes that are in a move status.
<a href="#">TMSS10Custom_BillByAge</a>	Produces TapeTrack Billing XML records based on the length of time a <a href="#">Volume</a> has been in a <a href="#">Repository</a> .
<a href="#">TMSS10ExpireByDate</a>	Adds a 'Move Pending' <a href="#">Flag</a> to <a href="#">Volumes</a> within the specified 'Next Move Date' range .
<a href="#">TMSS10ExpireDRStrategies</a>	Deletes all expired Disaster Recovery Strategies.
<a href="#">TMSS10ExpireFiles</a>	Deletes all expired files that have been uploaded to the TapeTrack Server.
<a href="#">TMSS10ExportFile</a>	Extracts TapeTrack data so that it can be reloaded to another TapeTrack Server.
<a href="#">TMSS10LibraryManager</a>	Synchronizes one TapeTrack Server with another.
<a href="#">TMSS10MergeXML</a>	Merges XML files at specified nodes.
<a href="#">TMSS10Mirror</a>	Replicates location information from one TapeTrack Server to another.
<a href="#">TMSS10ModifyFlags</a>	Sets or un-sets <a href="#">Volumes</a> flags.
<a href="#">TMSS10MoveLocation</a>	Moves <a href="#">Volumes</a> from one <a href="#">Repository</a> to another.
<a href="#">TMSS10MovePending</a>	Move <a href="#">Volumes</a> with a P flag.
<a href="#">TMSS10Reconcile</a>	Performs a batch Reconciliation on a <a href="#">Repository</a> .
<a href="#">TMSS10Resolve</a>	Resolves environmental variables in an input file.
<a href="#">TMSS10SCSI2ScanFile</a>	Creates a Scan-File from the current inventory of SCSI attached Media Changer.

Command	Description
<a href="#">TMSS10SlotAllocation</a>	Allocate slots to <a href="#">Volumes</a> that are un-slotted.
<a href="#">TMSS10UploadFile</a>	Upload a file to the TapeTrack Server.
<a href="#">TMSS10ValidateBarCode</a>	Validate Barcode formats.
<a href="#">TMSS10VolumeDelete</a>	Rename a <a href="#">Volume</a> or list of <a href="#">Volumes</a> .
<a href="#">TMSS10VolumeRename</a>	Rename a <a href="#">Volume</a> or list of <a href="#">Volumes</a> .

## Reporting Utilities

Command	Description	Report-ID
<a href="#">TMSS10Inventory</a>	Produces a report listing all of the selected Volumes.	100 101
<a href="#">TMSS10LibraryHealth</a>	Produces a report listing current health of selected customers.	
<a href="#">TMSS10ListCatalog</a>	Produces a report listing Catalog Entries	
<a href="#">TMSS10ListClients</a>	Produces a list of all TapeTrack Software that has connected to the TapeTrack Server.	
<a href="#">TMSS10ListCustomers</a>	Produces a list of TapeTrack <a href="#">Customer</a> records.	
<a href="#">TMSS10ListConsignments</a>	Produces a list of TapeTrack Consignments.	
<a href="#">TMSS10ListDRStrategies</a>	Produces a list of DR Strategies.	
<a href="#">TMSS10ListHistory</a>	Produces a list of <a href="#">Volume</a> history records.	104 105
<a href="#">TMSS10ListMoveHistory</a>	Produces a list of the movement history of each <a href="#">Volume</a> .	
<a href="#">TMSS10ListOutages</a>	Produces a list of TapeTrack Server downtime.	
<a href="#">TMSS10ListRepositories</a>	Produces a list of the current status of each <a href="#">Repository</a> .	
<a href="#">TMSS10ListStorageHistory</a>	Produces a list of storage history between specified date range.	
<a href="#">TMSS10ListUsage</a>	Produces a report on <a href="#">Volume</a> health.	
<a href="#">TMSS10LogStatsProcess</a>	Processes TapeTrack statistics file applying calculations and report in XML format.	
<a href="#">TMSS10MoveDateList</a>	Produce a list of <a href="#">Volume</a> set to move on each given date.	106
<a href="#">TMSS10MoveList</a>	Produce a report listing all of the <a href="#">Volumes</a> that are in a move status.	102 103
<a href="#">TMSS10ZoneList</a>	Produce a report listing Zones and <a href="#">Volumes</a> assigned to those Zones.

## Housekeeping Utilities

Command	Description
<a href="#">TMSS10PasswordResetDB</a>	Reset a TapeTrack password by zapping the TapeTrack User Database.

## Sync Utilities

Sync utilities are installed with TapeTrack Sync

Command	
<a href="#">TMSS10CSV2Fixed</a>	Converts a csv file to fixed width text file
<a href="#">TMSS10DownloadFile</a>	Downloads a file from the TapeTrack Server
<a href="#">TMSS10DRP_BRMS</a>	Extracts critical Volume information from a BRMS Disaster Recovery Plan File
<a href="#">TMSS10DRP_TSM</a>	Extracts critical Volume information from a TSM Disaster Recovery Plan File
<a href="#">TMSS10DRStrategy</a>	Creates a TapeTrack Disaster Recovery Strategy
<a href="#">TMSS10MoveScratch</a>	Resets the scratch flag of each Volume and move scratch Volumes to another <a href="#">Repository</a>
<a href="#">TMSS10Page2CSV</a>	Converts a report in Page Format to a CSV File
<a href="#">TMSSBatch</a>	Construct and execute a batch file with specified input
<a href="#">TMSS10SingleSpace</a>	Convert a file of words into a file delimited by a single delimiter.
<a href="#">TMSS10Sync</a>	Synchronize data from a file or ODBC source to a TapeTrack Server.

## SecureSync Utilities

<a href="#">TMSS10IRM_Export</a>	Reads in an Iron Mountain inventory file and creates a TapeTrack import file
<a href="#">TMSS10IRM_FTP</a>	FTP's an Iron Mountain transmission file
<a href="#">TMSS10SFTP</a>	SFTP's an Iron Mountain transmission file
<a href="#">TMSS10IRM_Reconcile</a>	Processes an Iron Mountain inventory file and produces a TapeTrack Scan-File for reconciliation
<a href="#">TMSS10IRM_Send</a>	Produces an Iron Mountain format picking and distribution file
<a href="#">TMSS10IRM_Sync</a>	Keeps the TapeTrack Server synchronized with an Iron Mountain inventory file
<a href="#">TMSS10Reconcile</a>	Performs a batch Reconciliation on a <a href="#">Repository</a> .

## Server Utilities

<a href="#">TMSS10LogStatsPrintDB</a>	Prints the contents of the Journal database
<a href="#">TMSS10ImportFileDB</a>	Program will load TapeTrack data produced by <a href="#">TMSS10ExportFile</a>
<a href="#">TMSS10LogStatsExtractDB</a>	Program will create an Extract file for each Customer from the Journal database
<a href="#">TMSS10PasswordResetDB</a>	Program will reset the password of a User
<a href="#">TMSS10ProcessMailDB</a>	Program will send emails to all TapeTrack Users with queued messages

## Desktop Software Utilities

Command	Description
<a href="#">TMSS10Ping</a>	Test the connection to a TapeTrack Framework Server.

See also [Run TMSS10Ping From TapeMaster](#)

## Framework Server Utilities

Command	
<a href="#">db_hotbackup</a>	Backup database while operational
