

TMSS10ExpireFiles

TMSS10ExpireFiles will expire and delete all files from the TapeTrack Server that match the [Customer-ID](#) filter and fit within the specified date range.

Synopsis

```
TMSS10ExpireFiles [-C Customer Filter] [-R Expiry Date Range] [-S logon string] [-X Exclusion File] [-t Test Mode]
```

Options

- -C [Customer-ID](#) filter.
- -R Range of dates to delete files.
- -S The Logon string argument sets the [Server Logon Information](#)
- -X Files to be excluded from deletion.
- -t True to run in test mode

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named `ACME_volumes` has the content `ACME_*. *`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME_*. *`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with `*LIST:` then rather than matching the literal value, each record in the file specified as `*LIST:filename` will be tested. If one matches the match will succeed.

Notes

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Examples

To delete all files with an expiry date within the year 2015 for [Customer](#) US02

Command line syntax

```
C:\>tmss10expirefiles -S username:-password@tapetrack.com -R "Y-2:y-2" -C "US02"
```

Output

```
