2025/12/01 05:49 1/3 TMSS10ExpireFiles

TMSS10ExpireFiles

TMSS10ExpireFiles will expire and delete all files from the TapeTrack Server that match the Customer-ID filter and fit within the specified date range.

Synopsis

TMSS10ExpireFiles [-C Customer Filter] [-R Expiry Date Range] [-S logon string] [-X Exclusion File] [-t Test Mode]

Options

- C Customer-ID filter.
- -R Range of dates to delete files.
- -S The Logon string argument sets the Server Logon Information
- -X Files to be excluded from deletion.
- -t True to run in test mode

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME.*.*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

Notes

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

Examples

To delete all files with an expiry date within the year 2015 for Customer US02

Command line syntax

```
C:\>tmss10expirefiles -S username:-password@tapetrack.com -R "Y-2:y-2" -C
"US02"
```

Output

```
