2025/12/01 14:11 1/2 TMSS10ExportFile

TMSS10ExportFile

Synopsis

TMSS10ExportFile [-S logon string] [-V volume filter] [-c config file] [-f output file] [-h download history]

Description

TMSS10ExportFile will extract TapeTrack data so that it can be reloaded to another TapeTrack Server.

Options

- -S The logon string argument sets the Server logon information
- -V Volume Filter which can be used to filter the traversal of Customer, Media, Volume, repository and flag values.
- c The config file argument specifies the path to the Batch Configuration File. The Batch
 Configuration File allows you to perform advanced traversal of Customer, Media and Volumes,
 perform advanced barcode pre and post processing and route program output to syslogd.
 Configuration File capabilities vary from program to program but the syntax remains the same.
 In the event that logic is not supported it will simply be ignored.
- - f Output file name.
- -h Don't download volume history records (default = false).

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

Exit Statuses

- 1. **zero** Program has ended successfully.
- 2. **non-zero** Program has not ended successfully.

Files

stdout: Output Reports.

stderr: Diagnostic messages.

stdin: Program input.

Example

Command line syntax

Last update: 2025/01/21 22:07

```
TMSS10ExportFile -S user:-password@server -V "US03.*.*" -f "TapeTrackExport_November.TTEXPORT" -h
```

Output

Outputs a file named TapeTrackExport_November.TTEXPORT of customer US03 without volume history for use in importing data into another TapeTrack server.
