

TMSS10ListContainer

TMSS10ListContainer lists containers and any assigned Volumes

Synopsis

```
TMSS10ListContainer [-A attribute index] [-S logon string] [-V volume filter]
[-c configuration file] [-s sync friendly output]
```

Options

- -A Extended Attribute index (default = 0).
- -S The Logon string argument sets the [Server Logon Information](#).
- -V [Volume Filter](#) which can be used to filter the traversal of Customer, Media, Volume, repository and flag values.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of [Customer](#), [Media](#) and [Volumes](#), perform advanced Barcode pre and post processing and route program output to syslogd.
- -s Produces output in a sync friendly format, including listing container-id relisted for each Volume entry.

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME.*.*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

[include page](#)

To include multiple Attributes in the report, add the required Attribute indexes separated by a comma (eg. -A 1,2,5).

Technical Support

The TapeTrack Software is commercially supported by a full-time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Files

stdout: Output Reports.

stderr: Diagnostic messages.

Example

Standard format output

Command line syntax

```
TMSS10ListContainer -S user:-password@server
```

Output

```

      System: TapeTrack
      Report ID: 123
Report Description: Container List
      Production Time: Friday, June 23, 2023 - 14:35:23 (AUS Eastern Standard
Time)
      Report Width: 79 bytes
