2025/12/01 11:28 1/2 TMSS10ListCustomers

TMSS10ListCustomers

TMSS10ListCustomers lists all Customer records, except hidden Customers, listing their Customer-ID, Description, current Volume count, Volume statistics and address.

Synopsis

TMSS10ListCustomers [-A attribute index] [-S logon string] [-V volume filter] [-c configuration file]

Options

- - A Extended Attribute index (default = 0).
- -S The Logon string argument sets the Server Logon Information.
- - V Volume Filter which can be used to filter the traversal of Customer, Media, Volume, repository and flag values.
- c The config file argument specifies the path to the Batch Configuration File. The Batch
 Configuration File allows you to perform advanced traversal of Customer, Media and Volumes,
 perform advanced Barcode pre and post processing and route program output to syslogd.

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME.*.*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

2021/06/16 02:14 · Scott Cunliffe include page

To include multiple Attributes in the report, add the required Attribute indexes separated by a comma (eg. -A 1,2,5).
