

# TMSS10ListDRStrategies

TMSS10ListDRStrategies lists the DR strategies, along with included [Volume](#) information within each DR strategy.

## Synopsis

```
TMSS10ListDRStrategies [-A attribute index] [-C customer filter] [-D description] [-S logon string]
```

## Options

- -A Specifies the Attribute index.
- -C [Customer-ID](#) filter.
- -D Description filter.
- -S The Logon string argument sets the [Server Logon Information](#).

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME\_volumes has the content ACME\_\*.\*, specifying FI:/etc/ACME\_volumes will have the same effect as -V ACME.\*.\*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with \*LIST: then rather than matching the literal value, each record in the file specified as \*LIST:filename will be tested. If one matches the match will succeed.

[include page](#)

To include multiple Attributes in the report, add the required Attribute indexes separated by a comma (eg. -A 1,2,5).

## Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

## Exit Statuses

1. **zero** Program has ended successfully.

2. **non-zero** Program has not ended successfully.

## Environment

## Files

**stdout:** Output Reports.

**stderr:** Diagnostic messages.

**stdin:** Program input.

## Example

### Command line syntax

```
TMSS10ListDRStrategies -S user:-password@server -C "US02" -D "LA*" -A 1
```

### Output

```

                System: TapeTrack
Report Description: Disaster Recovery Strategy List
    Report Notes: Customer-ID(US02) Description(Los Angeles Data Center)

    Report Width: 102 bytes
