

TMSS10ListStorageHistory

TMSS10ListStorageHistory lists the Storage History for each [Repository](#) within the specified date range.

Synopsis

```
TMSS10ListStorageHistory [-R date range] [-S logon string] [-V volume filter]
```

Options

- **-R** Specifies the date range.
- **-S** The Logon string argument sets the [Server Logon Information](#).
- **-V Volume Filter** which can be used to filter the traversal of [Customer](#), [Media](#), [Volume](#), [Repository](#) and [Flag](#) values.

If an argument value starts with the value **FI:**, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named **ACME_volumes** has the content **ACME_*.***, specifying **FI:/etc/ACME_volumes** will have the same effect as **-V ACME.*.***. Using **FI:** to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with ***LIST:** then rather than matching the literal value, each record in the file specified as ***LIST:filename** will be tested. If one matches the match will succeed.

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

Environment

Files

stdout: Output Reports.

stderr: Diagnostic messages.

stdin: Program input.

Example

Command line syntax

```
TMSS10ListStorageHistory -S user:-password@server -V "US02.LT0.*" -R "*:*
```

Output

```

System: TapeTrack
Report Description: Repository Usage Report
  Report Notes: Customer(Los Angeles Data Center) Media(LT0 Cartridge)
Repository(Library)
  US02LT0
    Report Width: 148 bytes
