

# TMSS10ListStorageHistory

TMSS10ListStorageHistory lists the Storage History for each [Repository](#) within the specified date range.

## Synopsis

```
TMSS10ListStorageHistory [-R date range] [-S logon string] [-V volume filter]
```

## Options

- -R Specifies the date range.
- -S The Logon string argument sets the [Server Logon Information](#).
- -V [Volume Filter](#) which can be used to filter the traversal of [Customer](#), [Media](#), [Volume](#), [Repository](#) and [Flag](#) values.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named `ACME_volumes` has the content `ACME_*. *`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME. *. *`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with `*LIST:` then rather than matching the literal value, each record in the file specified as `*LIST:filename` will be tested. If one matches the match will succeed.

## Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

## Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

## Environment

## Files

**stdout:** Output Reports.

**stderr:** Diagnostic messages.

**stdin:** Program input.

## Example

### Command line syntax

```
TMSS10ListStorageHistory -S user:-password@server -V "US02.LT0.*" -R "*:*" 
```

### Output

```

                System: TapeTrack
Report Description: Repository Usage Report
      Report Notes: Customer(Los Angeles Data Center) Media(LT0 Cartridge)
Repository(Library)
      US02LT0
      Report Width: 148 bytes

```

Date	Low	High	Average	Movement From	Movement To
