

# TMSS10ModifyFlags

## Synopsis

```
TMSS10ModifyFlags [-F new flags] [-S logon string] [-V volume filter] [-c configuration file]
```

## Description

TMSS10ModifyFlags adds and removes editable flags through the command line interface.

## Options

- -F Adds or removes flags from volumes.
- -S The logon string argument sets the [Server logon information](#)
- -V [Volume Filter](#) which can be used to filter the traversal of Customer, Media, Volume, repository and flag values.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of Customer, Media and Volumes, perform advanced barcode pre and post processing and route program output to syslogd.

## Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

## Example

To remove the Warning flag (W) you would use:

```
TMSS10ModifyFlags -S tapemaster:-password@localhost -F "!W"
```

Substitute your password for the password value.

A ! means remove the flag. Without an ! it will be added.

To set the encrypted flag on all LTO tapes:

```
TMSS10ModifyFlags -S tapemaster:-password@localhost -F "E" -V "*.LTO.*"
```
