TMSS10MoveDateList

TMSS10MoveDateList lists all volumes that are set to move within the specified date range.

Synopsis

TMSS10MoveDateList [-S logon string] [-V volume filter] [-c configuration file] [-e expiry] [-r range]

Options

- -S The Logon string argument sets the Server Logon Information
- -V Volume Filter which can be used to filter the traversal of Customer, Media, Volume, Repository and Flag values.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of Customer, Media and Volumes, perform advanced Barcode pre and post processing and route program output to syslogd.
- -e Use expiry date rather than Next move date: default = false
- - r Day range, 0 = all, -n = Last n entries in list, +n = First n entries in list.

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME.*.*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

Report-ID: 106

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

Last update: 2025/07/04 04:41

Exit Statuses

- 1. **zero** Program has ended successfully.
- 2. non-zero Program has not ended successfully.

Environment

Files

stdout: Output Reports. **stderr:** Diagnostic messages.

stdin: Program input.

Example

Command line syntax

```
TMSS10MoveDateList -S user:-password@server -r "-3" -V "US02.*.*"
```

Output

```
System: TapeTrack
         Report ID: 106
Report Description: Volume Movement Prediction List
      Report Notes: Movement Date(Monday, November 27, 2017)
   Production Time: Thursday, November 23, 2017 - 12:09:05 (AUS Eastern
Daylight Time)
      Report Width: 81 bytes
                           Repository Location
Seq. Barcode
     1 US02.LT0.000010L6 Library
                                       No-Alloc
            System: TapeTrack
         Report ID: 106
Report Description: Volume Movement Prediction List
      Report Notes: Movement Date(Tuesday, November 28, 2017)
   Production Time: Thursday, November 23, 2017 - 12:09:05 (AUS Eastern
Daylight Time)
      Report Width: 81 bytes
                           Repository
                                               Location
