

# TMSS10MoveLocation

TMSS10MoveLocation puts selected [Volumes](#) in a move from one [Repository](#) to another.

## Synopsis

```
TMSS10MoveLocation [-C move only if container moving] [-S logon string] [-V volume] [-X skip volumes assigned to a container] [-c configuration file] [-e exclude volumes already moving] [-f from repository] [-l apply move lock during move] [-t to repository]
```

## Options

- -C Move [Volume](#) only when assigned Container is moving and matches move requirements.
- -S The Logon string argument sets the [Server Logon Information](#).
- -V [Volume Filter](#) which can be used to filter the traversal of [Customer](#), [Media](#), [Volume](#), [Repository](#) and [Flag](#) values.
- -X Skip any volumes already assigned to a container.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of [Customer](#), [Media](#) and [Volumes](#), perform advanced Barcode pre and post processing and route program output to syslogd.
- -e Exclude any [Volumes](#) that are already in a Move Status.
- -f [Repository](#) to Move [Volumes](#) from.
- -l Apply a move-lock to [Volumes](#) during move.
- -t [Repository](#) to move [Volumes](#) to.

If an argument value starts with the value **FI:**, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named `ACME_volumes` has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using **FI:** to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with **\*LIST:** then rather than matching the literal value, each record in the file specified as **\*LIST:filename** will be tested. If one matches the match will succeed.

## Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

## Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

## Environment

### Files

**stdout:** Output Reports.

**stderr:** Diagnostic messages.

**stdin:** Program input.

## Example

### Command line syntax

Move all US02 LTO [Volumes](#) with a Barcode ending in 5L6.

```
TMSS10MoveLocation -S user:-password@server -V "US02.LT0.*5L6" -f "LIBR" -t  
"OFFS"
```

### Output

```
System: TapeTrack
Report Description: Volumes Moved
    Report Notes: From(LIBR) To(OFFS)
    Production Time: Monday, November 27, 2017 - 12:56:38 (AUS Eastern
Daylight Time)
    Report Width: 92 bytes

Seq.    Barcode          From           To
Container
