

TMSS10ZoneList

TMSS10ZoneList lists each [Zone](#) and the [Volumes](#) assigned to them.

Synopsis

```
TMSS10ZoneList [-S logon string] [-V volume filter] [-f report format]
```

Options

- -S The Logon string argument sets the [Server Logon Information](#)
- -V [Volume Filter](#) which can be used to filter the traversal of [Customer](#), [Media](#), [Volume](#), [Repository](#) and [Flag](#) values.
- -f Report format.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named `ACME_volumes` has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with `*LIST:` then rather than matching the literal value, each record in the file specified as `*LIST:filename` will be tested. If one matches the match will succeed.

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

Environment

Files

stdout: Output Reports.
stderr: Diagnostic messages.
stdin: Program input.

Example

Zone List Report - format 1

Command line syntax

```
TMSS10ZoneList -S user:-password@server -f 1
```

Output

```
System: TapeTrack
Report Description: Zone Inventory
Report Notes: ZoneID(1:1) Description(Drawer 1 divider 1)
Report Width: 113 bytes
```

Seq.	Customer	Slot	Next Move	Media Type
