2025/12/01 03:39 1/2 TMSSBatch

## **TMSSBatch**

TMSSBatch will open the TapeTrack Batch Utility, allowing simplified input of information to create a batch file for execution of a command line utility executable, including input of arguments, input files and specification of the working directory.

## **Options**

- A Program variables
  - **Executable Path** Full directory path to selected executable (non editable).
  - **Executable Program** Target executable program.
  - **Arguments** Arguments required for executable.
- B Environmentable Variables
  - **Stdin File** directory path and file for input to stdin if required.
  - **Environment** Environment variables if required (e.g. TMSSNOMD5).
  - Working Directory Working directory to load and/or save settings to/from.
- C Logging
  - Log File Directory path to save log file to.
- D Control Buttons
  - Load Load variables from file.

- Save Save current variables to file.
- Open Log Open current log file.
- E Message Tabs
  - **Program Output** Output from executed batch file, from stdout.
  - **Program Messages** Output from executed batch files, from stderr.
- F Display Panel Display panel for batch file output.
- G Control Buttons
  - Run Execute batch file script.
  - Cancel Exit Batch Utility.

## **Technical Support**

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

## **Exit Statuses**

- 1. **zero** Program has ended successfully.
- 2. non-zero Program has not ended successfully.
