The TapeTrack Control Panel is divided into two tabs: TapeTrack Servers and Advanced Connection Settings.

TapeTrack Servers

The TapeTrack Servers tab displays active server connections.

TapeTrack Servers	Advanced Connection Settings				
	Address	IP	Port	Proxy	Response
GazillaByte LLC t	apetrack.gazillabyte.com	192.241.211.124	5000	No	OK (124.00 ms

Right-Click Operations

There are four options available when right-clicking in the TapeTrack Servers tab.

TapeTrack Server	rs 📓 Advanced Connection Settings		
hort Name GazillaByte LLC	Address tapetrack.gazillabyte.com	IP 192.241.211.124	Port Proxy Response 5000 No OK (124.00 r
~ 5	Add Delete Properties Create Desktop Shortcut		

• Add: Launches the Server Information window to add additional connections. There are four fields in the Server Information Window.

Server Information X						
Server Name	GazillaByte					
Server Address	tapetrack.gazillabyte.com					
Server Port	5000					
Use HTTP Proxy	False					
Use Single Sign-On	False					
OK Cancel						

- **Short Name**: How this connection will be displayed in the TapeTrack login window.
- **Address**: The address of the TapeTrack Server.
- IP: The IP of the Server.
- $\circ~\textbf{Port}:$ The port of the TapeTrack Server.
- **Proxy**: If set to "true", the HTTP Proxy Settings will need to be set in the "Advanced Connection Settings" tab. See below.
- **Delete**: Deletes the Server from the list.
- **Properties**: Launches the Server Information window above so that changes can be made to a Server.
- **Create Desktop Shortcut**: Places a shortcut to this connection on the desktop of your Windows PC.

Advanced Connection Settings

The **Advanced Connection Settings** tab provides additional settings for when a Server uses an HTTP Proxy. It has the following fields:

- Address: The IP Address or Name of the HTTP Proxy Server.
- **Port**: The TCP/IP Port of the HTTP Proxy Server.
- User-ID: The User-ID for Proxy Authentication (if required).
- **Password**: The Password for Proxy Authentication (if required).
- Automatically detect HTTP Proxy: Click this button to automatically detect an existing HTTP Proxy Connection.
