

# Scan File

A scan file is a listing of volume ID's that, through TapeTrack parsing, is converted in to a Scan-map of fully qualified barcodes for input into command line processes such as repository reconciliation.

## Scan File

A screenshot of a Notepad window titled "reconcile\_2017-11-29.txt - Notepad". The window contains a list of seven volume IDs, each on a new line. The menu bar at the top shows "File", "Edit", "Format", "View", and "Help".

```
reconcile_2017-11-29.txt - Notepad
