

# Attribute List Values

Attribute Lists allow you to set a defined list of attribute values for a user to select from. This ensures that all attribute values entered against a Volume are limited to supplied list, removing the ability to enter unwanted values or spelling differences (eg Removed or removed) and increasing productivity by removing the need to retype common attribute values.

The following example illustrates the creation and implementation of two Attribute Lists, Weekly Backup with the values of the days of the week and Manufacturer with the values of the Volume brands Dell, IBM, Imation and Sony.

## Setting The Attribute List

The Server Options allow global settings for Customer, Data Clusters and Simple Management Rules in one location.

To open the Server Options in TapeMaster, select Administration → Server Options from the main menu.

Select the tab Attribute List Values

In the section Attribute List [1], enter the string Weekly Backup into the field Description, along with the Attribute Values separating values by comma's, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday into the field Values.

In the section Attribute List [2], enter the string Manufacturer into the field Description, along with the Attribute Values, separating values by comma's, Dell, IBM, Imation, Sony.

Server Information

Attribute List Values

Description	<b>Weekday Backup</b>
Values	<b>Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday</b>
Description	<b>Manufacturer</b>
Values	<b>Dell, IBM, Imation, Sony</b>

Once all Lists have been added, click Save to add Values to the Framework Server.

## Adding Extended Attributes To TapeMaster

Right click the required [Customer](#) from the [Customer Tree](#) and select Properties

The screenshot shows the TapeTrack TapeMaster interface. On the left, the Customer Tree displays 'GazillaByte LLC - Production (2,737/756)' and 'US02 - Los Angeles Data Center (326/5)'. A context menu is open over 'US02 - Los Angeles Data Center', with 'Properties' highlighted. The main pane shows a 'Volumes' table with columns: ID, Current Location, and Target Location. Each column has a search/filter icon.

From the Edit Customer window, select the Attributes tab.

Under Extended Attribute 1,

- Enter a descriptive name for the attribute, Backup Weekday.
- From the Type field select List to display the Options fields.
- From the field Index, select the required list, in this case Weekday Backup.
- Set Required to True to have this list displayed in Lite when Sending [Volumes](#).

Under Extended Attribute 2,

- Enter a descriptive name for the attribute, Volume Manufacturer.
- From the Type field select List to display the Options fields.
- From the field Index, select the required list, in this case Manufacturer.
- Set Required to False as it is not required to be displayed in Lite when Sending [Volumes](#).

Click Save to update the information in TapeTrack.
