2025/12/01 10:04 1/1 Billing and Charge-back

Billing and Charge-back

TapeTrack has a powerful billing and charge-back engine.

The engine is comprised of:

- 1. A billing extract module.
- 2. A billing calculation module.
- 3. Third-party interfaces such as the TapeTrack Quickbooks Interface.

The Extract Module

The purpose of the Billing Extract module TMSS10LogStatsExtractDB is to read through the TapeTrack history tables and create billing extract files that match the date range specified when the program is called.

At the completion of the program you will have one ttstats file for each TapeTrack customer.

The TTSTATS File

Each record of the TTSTATS file starts with a control character, which is then followed by additional data.

The first record will always be a "C" type record, which indicates the TapeTrack Customer the file has been created for.
