

Data Protector Sync Cookbook

Data Protector is a HP enterprise backup solution and is available for Windows, UNIX and Linux.

The omnirpt command

The omnirpt command is available on systems with the Data Protector User Interface component installed.

The omnirpt command generates various reports about the Data Protector environment

```
omnirpt -report media_list -tab > var\dataprotector.txt
```

Example omnirpt output

```

Converting omnirpt tab file to Fixed length file

Output from omnirpt, while tab delimited, can produce offset columns depending on string lengths. To ensure the column offsets are consistent the output is passed through [TMSS10CSV2Fixed](#).

Run [TMSS10CSV2Fixed](#) directing the file dataprotector.csv through stdin to get a starting point for columns and offset values, adjust the offsets to match the data you wish to import, omitting data from irrelevant columns with the offset 0 0.

```
TMSSDELIMITER=TAB
```

```
TMSS10CSV2Fixed < dataprotector.csv
```

```

                System: TapeTrack
Report Description: CSV Statistics
Production Time: Monday, October 01, 2018 - 13:46:07 (AUS Eastern
Standard Time)
Report Width: 120 bytes

```

```
Seq.  Min.  Max.  Heading Value
-----
```

```

0      11    27 # Medium ID
1       5    19 label
2       0     8 location
3       4    28 Status
4       9    20 Protection
5       9    10 Used [MB]
6      10    20 Total [MB]
7       9    20 Last Used
8       4    11 Pool
9       4    11 Type
-----
-----

```

Suggested Usage:

```
tmssl0csv2fixed 0 27 28 19 48 8 57 28 86 20 107 10 118 20 139 20 160
11 172 11
```

Changing the offset values to pick up volume ID (column 2, offset 30 length 8), location (column 3, offset 48, length 8) and description (column 9, offset 160, length 12).

```
TMSS10CSV2Fixed 0 0 30 8 48 8 0 0 0 0 0 0 0 0 0 0 160 12 0 0 <
dataprotector.csv > dataprotectorFixed.txt
```

Sample output with selected columns
