

Iron Mountain Inventory

Iron Mountain can generate a CSV file listing all the tapes stored in their offsite vault, which can be downloaded via FTP or SFTP. Each file includes a timestamp in its name, complicating the download process with standard FTP or SFTP tools. However, TapeTrack offers an FTP and SFTP utility that simplifies downloading the correct file.

For customers with multiple Iron Mountain accounts, the CSV file can consolidate all accounts into a single file, reducing the need for multiple downloads. Typically, the file is available once per day, though some customers have requested it up to four times daily. Iron Mountain is generally hesitant to increase the frequency, and without a SecureSync API for on-demand information retrieval, customers must negotiate the frequency based on their data processing needs.

Iron Mountain requires a form to be completed, ideally by your account manager. However, some account managers may be unaware of this functionality, the form itself, or the necessary details to include. TapeTrack only needs a list of Tape IDs stored in Iron Mountain's vault, along with the account code if multiple accounts are tracked. The default CSV format is sufficient for this purpose.

Acct. #:	<input type="checkbox"/>	Vaults:	<input type="checkbox"/>	File Types:	<input type="checkbox"/> Pick Same Day (Y/N):	<input type="checkbox"/>
Remarks: <input type="checkbox"/>						

From experience, once you talk to the right people at Iron Mountain the download can be setup with a few days, but it can take up to a month if communication breaks down at their end so we advise checking with your account representative if the process is taking longer than expected.

While waiting on Iron Mountain to enable SFTP file transfer to your inventory report, TapeTrack's synchronization of your offsite media can be executed using a manually downloaded CSV file from the Iron Mountain SecureSync web interface.

Downloading Inventory To CSV

Log in to Iron Mountains securesync interface at <https://www3.securesync.com> with your credentials.

The screenshot shows the login interface for the SecureSync application. The title bar reads "SecureSync - Windows Internet Explorer" and the address bar shows the URL "https://www3.securesync.com/". The main content area features the "SecureSync" logo. Below the logo, a message says "Please enter your user name and password." There are three input fields: "User Name:" with a required asterisk, "Password:" with a required asterisk, and "Language:" set to "English (United States)". Below these fields are two buttons: "Submit" and "Clear". A link "Forgot your Password?" is visible to the right of the password field. A note at the bottom left states "* This is a required field."

Select the required customer.

The following is/are required to continue logging on to SecureSync. Please provide the following information.

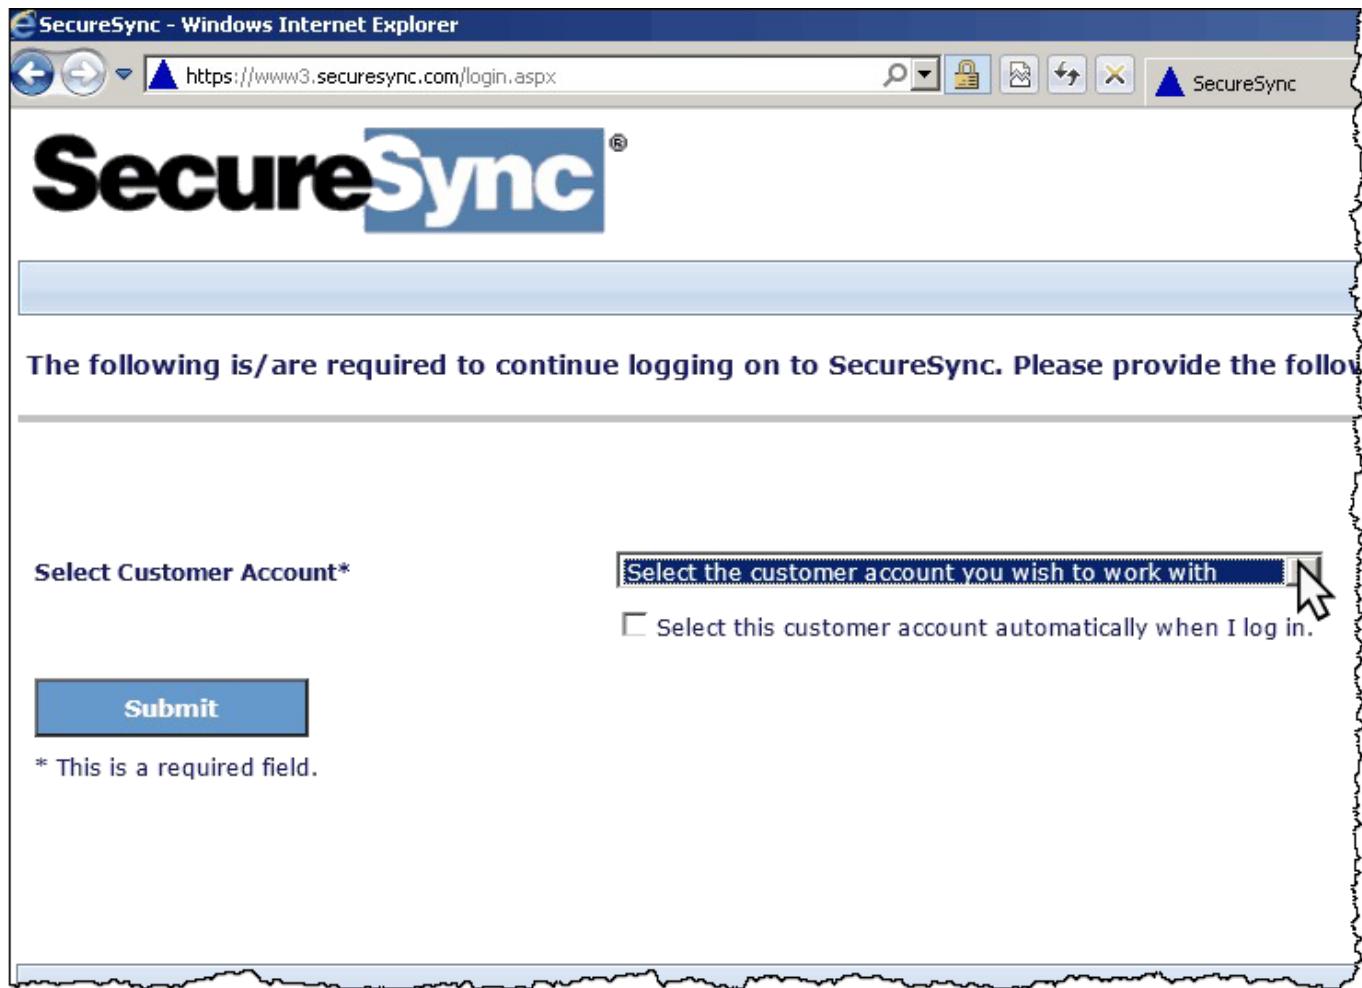

Select Customer Account*

Select the customer account you wish to work with

Select this customer account automatically when I log in.

Submit

* This is a required field.

From the homepage, select the Menu in the top left corner.

In the dropdown menu, choose Process Media → Download Media.

The screenshot shows a Windows Internet Explorer window for the SecureSync website. The URL in the address bar is <https://www3.securesync.com/m/HomePagePersonnel.aspx>. The page title is "SecureSync". A dropdown menu is open under the "Process Media" option, with "Download Inventory" highlighted. The menu also includes "Container Pickup", "OM Distribution List", "Scan Verification", and "Send List File". A link "Open Requests (0)" is also visible. The top right corner of the page says "Current C".

Select the type of inventory data you need: Open Media.

Ensure the file format is set to CSV.
