Adding Long Barcode Values To Extended Attributes

When adding hashed Long Barcodes to TapeTrack, the unhashed Barcode can be automatically added to the Volume's Description or an Extended Attribute to allow a human readable along side the hashed value.

Sample Data

In this example we will use the following Volume-ID's to scan into TapeTrack TapeMaster

- VOLUME_1001
- 100010002234
- MONDAY VOLUME 1

Adding Extended Attribute Long Barcode

Adding An Extended Attribute For Long Barcode

If you are adding the unhashed Barcode to the Volume field Description or you have already added the required Extended Attribute you can skip this section.

Extended Attributes are added at a Customer level and are then available to all Media types that belong to that Customer.

To add an Extended Attribute, right-click the required Customer-ID from the Customer Tree and select Properties.

Left-click in the first available blank Extended Attribute field Name .

Enter a descriptive name for the Extended Attribute (eg. Long Barcode), leaving the Type as String.

Select the Options tab. From the Long Barcode Attribute field, select the Extended Attribute field you want the un-hashed Long Barcode to be added to (eg. Long barcode).

Scan-In the Volumes using your preferred method.

All Volumes Scanned with Long Barcodes will automatically have the un-hashed barcode value added to the Extended Attribute selected in the previous steps.

Viewing Long Barcode Values

To view the Extended Attribute (Long Barcode) in TapeTrack TapeMaster, from the main menu select View \rightarrow Volume List Properties.
