

Restore Previous Date

Adding a Restore Previous Date Simple Management Rule to a Repository will maintain the Next Move Date currently applied to the Volumes when moved to the Target Repository.

Creating The Rule

Select the required Customer and Media Type so that the Inventory is displayed in TapeMaster.

Select the Simple Management tab, right click and select Add.

Identity Tab

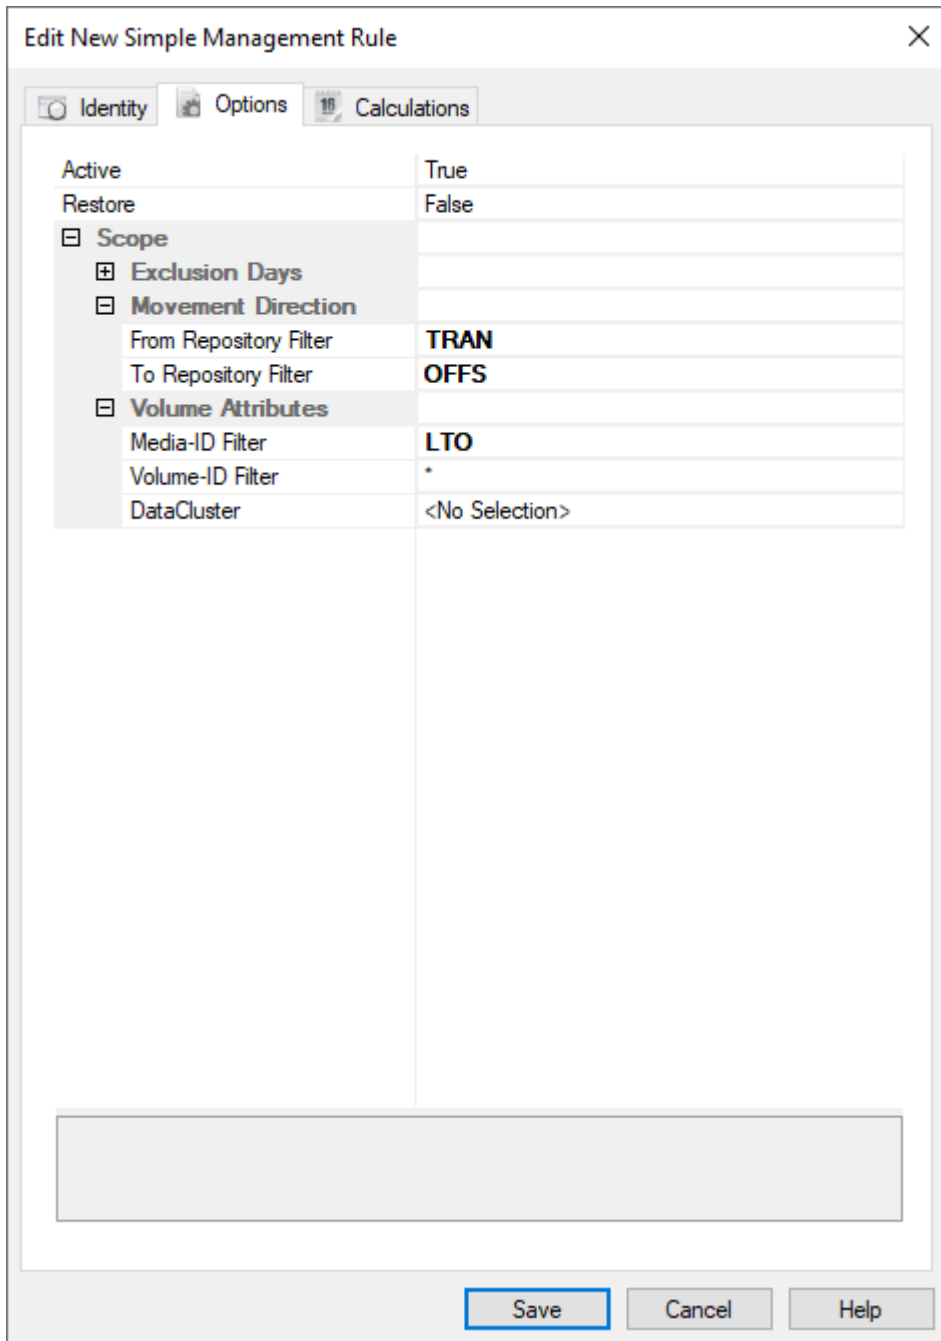

Add a description that matches the function or purpose of the rule.

The screenshot shows a dialog box titled "Edit New Simple Management Rule" with a close button (X) in the top right corner. The dialog has three tabs: "Identity" (selected), "Options", and "Calculations". Under the "Identity" tab, there is a section labeled "Index/Description" containing three input fields: "Customer-ID" with a dropdown menu showing "SC01" and "Sherbrooke", "Index" with a text box containing "0", and "Description" with a text box containing "Next Move Date". At the bottom of the dialog, there are three buttons: "Save" (highlighted with a blue border), "Cancel", and "Help".

Options Tab

Add in filter values to limit the rule only functioning on the required Volumes.

In this example the target is LTO Volumes moving from TRAN to OFFS.

Calculations Tab

Set the Rule Type dropdown box to Restore Previous Date.

Save Rule

Click Save to commit the Simple Management Rule.

Enabling Simple Management Rule For Repository

Return to the Inventory tab.

Right-click on the Target Repository and select Properties.

Select the Options tab.

Set the option Force Simple Management to True and click Save to update.

update doco, simple management, next move
