

Simple Management Cookbook

The purpose of this section is to provide practical examples on how to configure Simple Management to automate the scheduled movement of [Media](#) from one [Repository](#) to another.

See the [Simple Management section](#) for a detailed description.

Enabling Simple Management

Simple Management can be enabled for a [Target Repository](#), or for a specific [Volume](#).

When enabled at a [Repository](#) level, a matching Simple Management Rule must exist with a matching scope for every [Volume](#) moved to that [Repository](#).

When enabled for a specific [Volume](#), a Simple Management Rule must exist with a matching scope that for every [Repository](#) that the [Volume](#) will move to.

Enabling at a Repository level

- Force Simple Management option is set to True.
- As Simple Management sets a Next Move Date, and [Volumes](#) are traditionally moved using the [TMSS10MovePending](#) program, it is recommended that the Next Repository option is set to an appropriate value.

Edit Repository: Library

Identity	Zones	Slot Usage	Options	Usage History	Movement History	Certification
Type	Library					
Scratch Mode	No Change					
Scratch Priority	0					
Offsite	False					
Primary	False					
No Distribution	False					
Internal	False
