

Simple Management Cookbook

The purpose of this section is to provide practical examples on how to configure Simple Management to automate the scheduled movement of media from one repository to another.

For a detailed description of the Simple Management Subsystem please see the [Simple Management section](#).

Enabling Simple Management

Simple Management can be enabled for a [Target Repository](#), or for a specific [Volume](#).

When enabled at a [Repository](#) level, a matching Simple Management Rule must exist with a matching scope for every [Volume](#) moved to that [Repository](#).

When enabled for a specific [Volume](#), a Simple Management Rule must exist with a matching scope that for every [Repository](#) that the [Volume](#) will move to.

Enabling at a Repository level

- Force Simple Management option is set to True.
- As Simple Management sets a Next Move Date, and [Volumes](#) are traditionally moved using the [TMSS10MovePending](#) program, it is recommended that the Next Repository option is set to an appropriate value.

Edit Repository: Library

Identity	Zones	Slot Usage	Options	Usage History	Movement History	Certification
Type	Library					
Scratch Mode	No Change					
Scratch Priority	0					
Offsite	False					
Primary	False					
No Distribution	False

Sort Sequence	0					
Force Simple Management	True					
No Next Repository	False					
Allow Deletes	True					
Allow Overlaps	False					
De-assign from Container	False					
Empty Container	False					
Do not slot if Container	False					
Do not slot	False					
Require Tag	False					
Require Tag Reset	False					
No re-move	False					
Disallow backward next move date changes	False					
Reset Data Cluster	False					
Confirm Container Contents	False					
Move Container Contents	False					
Late Threshold	0					
Highwater Offset	0					
Movement Mode	None					
Next Repository	Offsite Vault					
Enable Slotting	False					
<input type="checkbox"/> Capacity Force Simple Management When a Volume moves to this Repository always run Simple Management						
<input type="button" value="Save"/> <input type="button" value="Cancel"/> <input type="button" value="Help"/>						

Recipes

Restore or Maintain Next Move Date

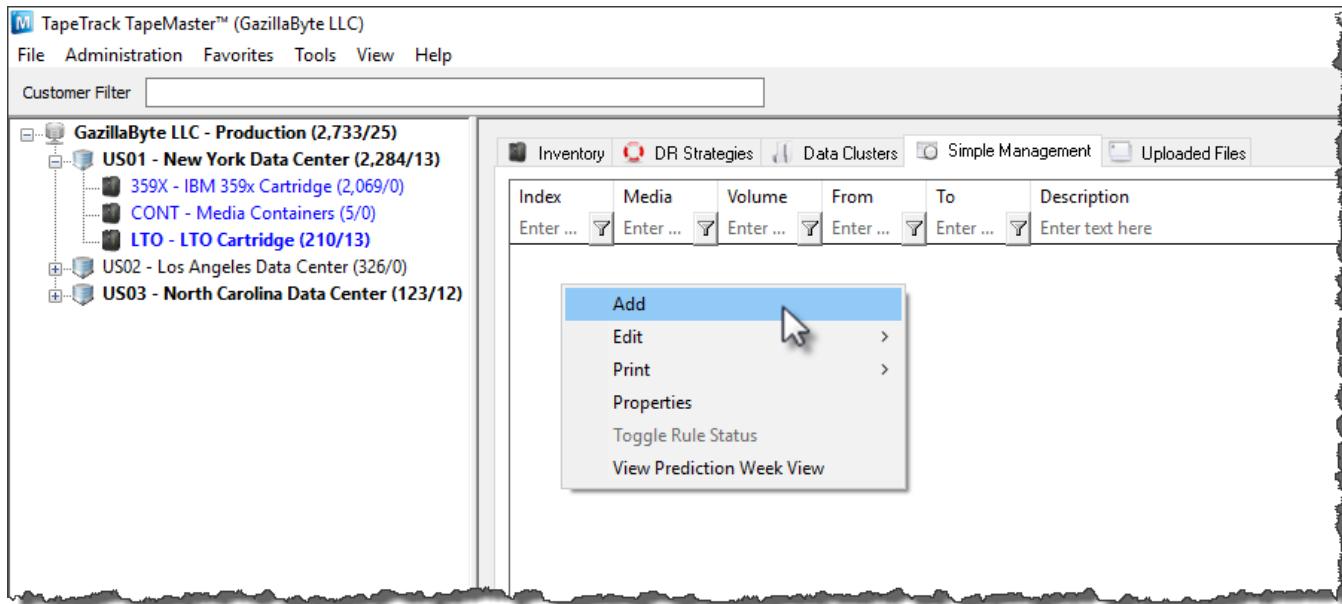

Every 2nd Wednesday Of The Month

The 2nd last day of each month

First of all check and confirm that the properties of the required repositories have had the Force Simple Management option set to True, and the Next Repository option is set to the repository as per the intended rule.

Select the Simple Management tab above the Inventory window to the right of the Customer tree

view. Right-click and select Add.

This will open the Edit New Simple Management Rule window and display the Identity tab. On this tab enter an appropriate description into the Description field. In this example 'Return 2nd Last Day' has been entered.
