The W flag can be removed by either:

- Selecting the volume by clicking on it in the Inventory window and pressing F2.
- Selecting the volume by clicking on it in the Inventory window, right click and select Special Operations → Modify → Flags. From the Modify Flags window, expand the Warning menu item and from the drop down menu item Value select Remove Flag and click Apply Updates to close the window and remove the W flag.

When all warning flags have been removed from volumes of a media type the orange highlighting of the Customer and media type will be removed when the customer tree is refreshed. To refresh manually, click in the customer tree window and press F5. If the customer has volumes in other media types with the warning flag, the orange highlighting will remain for those media types and customer ID.
