

# Adding a Desktop Server Connection

When using the TapeTrack Desktop Software you will have to have one or more TapeTrack Framework Server entries defined so that you can connect to a server endpoint.

This can be done in the following ways:

1. Adding a connection interactively.
2. Adding a connection to the Configuration File.
3. Clicking on a URL.

## Adding a connection interactively

**Server Information** [X]

Server Name	<b>My Server</b>
Server Address	<b>tapetrack.mycompany.com</b>
Server Port	5000
Use HTTP Proxy	False
Use Single Sign-On	False

**Server Address**  
TapeTrack Server name or IP address  
Example 'tapetrack.mydomain.com' or '192.168.1.10'

**TapeTrack Options** [X]
