Adding a Desktop Server Connection

When using the TapeTrack Desktop Software you will have to have one or more TapeTrack Framework Server entries defined so that you can connect to a server endpoint.

This can be done in the following ways:

- 1. Adding a connection interactively.
- 2. Adding a connection to the Configuration File.
- 3. Clocking on a URL.

9

2025/04/12 02:06

When using TapeTrack TapeMaster that was installed as part of the TapeTrack Framework Server installation, an entry for localhost will be automatically added by the installer.

Adding a connection interactively

🔒 Logon		×
	Connection to this TapeTrack Server is restricted to authorized users only. Please select your TapeTrack Server and enter your credentials. All access attempts and successful connections will be recorded. Server Local Server Select a Server or click the button above to add a new Server.	
	User or Email Password No MD5 (required for Active Directory authentication) Save User History OK	Cancel
