2025/12/01 12:42 1/1 Desktop Configuration File

Desktop Configuration File

Each TapeTrack Desktop Program has a Configuration File which can be used to set certain values that determine how the program will operate.

By default the Configuration File will be loaded from the Current Directory, which by default is the same directory as the Desktop Program executable.

To change the location of the Configuration File you can set the Environmental Variable TMSSCONFIGFILE.
