

# Container Contents And Movements

## Add Volumes To A Container

Volumes can be added to a container from the volumes inventory window, the containers properties window, [container assignment utility](#) excel import function or command line program [TMSS10AssignContainer](#)

## Remove Volumes From Containers

Volumes can be removed from an assigned container from the volume inventory window, container inventory window, container properties window and automatically via repository property options.

## Moving Volumes From One Container To Another

Volumes can be moved from their current container to another from the volume inventory window, container properties window, [container assignment utility](#), excel import function or command line program [TMSS10AssignContainer](#)

## Moving Container Contents When Container Moves

Volumes can be set to move and confirm at target repository automatically when the container is moved.
