## **Container Contents And Movements**

Adding volumes to a container

Removing volumes from a container

Moving volumes from one container to another

Moving volumes with a container

## **Remove Volumes From Containers**

Volumes can be removed from an assigned container from the volume inventory window, container inventory window, container properties window and automatically via repository property options.

## **Moving Volumes From One Container To Another**

Volumes can be moved from their current container to another from the volume inventory window, container properties window, container assignment utility, excel import function or command line program TMSS10AssignContainer.

## **Moving Container Contents When Container Moves**

Volumes can be set to move and confirm at target repository automatically when the container is moved. This process is managed through settings within the individual repository properties options tab.
