

# TapeTrack Server Connection via URL Protocol Handler

When TapeTrack Lite and TapeTrack TapeMaster are installed, the InstallShield installer will register each respective product as a URL Protocol Handler.

This allows one of the respective products to be launched from a webpage URL or Windows Shortcut.

The protocol is registered as **tapetrack**.

If both TapeTrack TapeMaster and TapeTrack Lite are installed, the Protocol Handler will be associated with the last product installed.

## Example

All user and server details shown are examples only. You will need to insert your own values in order to make a successful connection to your server.

Connect as user testuser with password testuser to server testbed.tapetrack.com on port 5000 by clicking:

```
<html> <a href="tapetrack:\\testuser:testuser@testbed.tapetrack.com:5000">Click Here</a>
</html>
```

```
tapetrack:\\testuser:testuser@testbed.tapetrack.com:5000
```
