Volume History

Volume history tab displays all historical records attached to a volume including creation, location movements and user interactions.

History Summary

Historical events for the volume display summary details on the **History** tab.

For each of these events, the date, time type and locations are listed.

Types of historical events include:

- Added Creation of volume.
- Deleted Deletion or Removal of volume.
- Target New Target location, volume place in a move.
- Scanned-Out Scanning volume out to record leaving current repository.
- Scanned-In Scanning in volume to confirm arrival at target repository.
- Scratch Scratch status (Z flag) added to volume.
- !Scratch Scratch status removed from volume.
- Date Adding next move date to volume.

History Details

Right clicking on a historical entry, or double clicking, and selecting Details will open a **History**

Details window.

This provides a more verbose listing of the historical entry including:

- Dates and Times including UTC offset, source time and time zone.
- User performing the action including IP, TapeTrack software and operating system.
- Next Move date
- Volume Flags
- Locations including to, from and zone information if applicable.

Exporting History

To export historical entries, select required entry or range select entries (Ctrl+Click, Shift+Click), right-click and select Export and follow prompts to export to required file type.
