

# ChangeCase

Change the case of a field.

## Phase

This instruction is used by the TapeTrack Import Engine.

## Syntax

```
ChangeCase(field, type);
```

*string field;*

*string type;*

LOWER, UPPER, CAPITALIZED or INVERTED

| Variable | Type   | Description  | Min Length | Max Length |
|----------|--------|--|------------|------------|
| field    | String | The field for this instruction.                      | 1          | 128        |
| type     | String | The special string from the below Type Values table. | 1          | 10         |

  

| Type Values |   |
|-------------|---|
| Value       | Description   |
| LOWER       | The data in the field will be converted to lower case.  |
| UPPER       | The data in the field will be converted to upper case.  |
| CAPITALIZED | The data in the field will be converted so that the first letter of each word is capitalized.               |
| INVERTED    | The data in the field will be converted so that any upper case character will be lower case and vice versa. |

## Example

To change the Description value my description value to My Description Value

```
ChangeCase(DESCRIPTION, CAPITALIZE);
```
