

# SetCSVDelimiter

Set the delimiter to be used in CSV processing and instruct the engine to process each record as CSV.

## Phase

This instruction is used by the TapeTrack Import Engine.

## Syntax

```
SetCSVDelimiter(delimiter);
```

| Variable  | Type   | Description  | Min Length | Max Length |
|-----------|--------|--|------------|------------|
| delimiter | String | The delimiter to be used when parsing a CSV file. This is usually a comma (","). | 1          | 1          |

## Example

Parse a CSV file using a comma as the delimiter.

```
SetCSVDelimiter(",");
```
