

SetTruncationChars

Characters that should be used to determine when to truncate a field.

Phase

This instruction is used by the TapeTrack Import Engine.

Syntax

```
SetTruncationChars(field, chars);
```

string field;
string chars;

field	The field for this instruction.
chars	A string containing a list of characters which should be used for truncation.

Example

Truncate the field VOLUME at any character- or [**

```
SetTruncationChars(VOLUME, "- [");
```
