addmovedateadjustment

AddMoveDateAdjustment

Add a specific number of days, months, years to the Next Move Date if a field value matches a filter value.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

AddMoveDateAdjustment(field, filter, years, months, days);

string field; string filter; integer years; integer months; integer days;

| field | The field to compare against. |
|--------|----------------------------------------------------|
| filter | A filter value to compare the field value against. |
| years | The number of years to add to the Next Move Date. |
| months | The number of months to add to the Next Move Date. |
| days | The number of days to add to the Next Move Date. |

Example

Extract(MOVEDATE, 4, 10, 0); Extract the MOVEDATE from offset 4, length 10 of the report body.

Extract the DESCRIPTION from offset 5, length 100 of the report body. Extract(DESCRIPTION, 5, 100, 0); # # Adjust the extracted MOVEDATE by 7 years if the DESCRIPTION matches the pattern *YEARLY*. AddMoveDateAdjustment(DESCRIPTION, "*YEARLY*"; 7, 0, 0); </sxh>
