#ddRepositoryOnWriteTime 10, length 20.

Extract(WRITEDATE, 10, 20, 0);

Set a Repository value based upon a range of Write Times. #Set the WRITEDATE format.

SetWriteDateFormat("%H:%M:%%S %%d/%m/%%Y");

Phase

Extract the DESCRIPTION from column 11, length 100.

Extract(DESCRIPTION, 11, 100, 0);

This instruction is used by the TapeTrack Synchronization Engine.

If the DESCRIPTION contains YEARLY and the WRITEDATE is within one day move the Volume to LIBR and give it a one day MOVEDATE.

Special Considerations
AddrepositoryOnWriteTime(DESCRIPTION, "*YEARLY*", "0:1", "LIBR", "0:1");

If the DESCRIPTION contains YEARLY and the WRITEDATE is within one year move the Masumetrtetight will and to be the object of the object of the matching AddRepositanty@pylftitafoTrimevets&cRIATTIONs been to change the kep of the kep of the change of the

Syntax From:

sthing the dete; 2025/01/21 22:07

string movedate;

field	A field for comparison.
filter	A filter to compare against.
time	Number of hours, days, months and years from the Write Date.
target	The Target Repository.
movedate	Number of hours, days, months and years from the Write Date to set the Move Date.

Example

Set the Repository based upon time from Write Date.**
