

# AddSkipOnRepositoryChange

Skip the update of a Volume if the Current of Target Repository is equal to a filter value.

## Phase

This instruction is used by the TapeTrack Synchronization Engine.

## Syntax

**AddSkipOnRepositoryChange**(*proposed*, *target*, *current*);

string *proposed*;  
string *target*;  
string *current*;

proposed	Filter value representing the proposed change to the Target Repository.
target	Filter value representing the current Target Repository value.
current	Filter value representing the current Current Repository Value

## Example

Skip an update if the proposed change is HOLD and the current target repository is LIBR.

```
#  
# Skip an update if the proposed change is HOLD, the target Repository is  
# LIBR and the current is any.  
AddSkipOnRepositoryChange("HOLD", "LIBR", "*");
```
