# AddSkipOnRepositoryChange

Skip the update of a Volume if the Current of Target Repository is equal to a filter value.

### **Phase**

This instruction is used by the TapeTrack Synchronization Engine.

# **Syntax**

### **AddSkipOnRepositoryChange**(proposed, target, current);

string proposed; string target; string current;

proposed	Filter value representing the proposed change to the Target Repository.
target	Filter value representing the current Target Repository value.
current	Filter value representing the current Current Repository Value

## **Example**

Skip an update if the proposed change is HOLD and the current target repository is LIBR.

```
#
# Skip an update if the proposed change is HOLD, the target Repository is
LIBR and the current is any.
#
AddSkipOnRepositoryChange("HOLD", "LIBR", "*");
```
