

# AddSkipOnRepositoryChange

Skip the update of a Volume if the Current of Target Repository is equal to a filter value.

## Phase

This instruction is used by the TapeTrack Synchronization Engine.

## Syntax

**AddSkipOnRepositoryChange**(*proposed*, *target*, *current*);

string *proposed*;  
string *target*;  
string *current*;

|          |   |
|----------|---|
| proposed | Filter value representing the proposed change to the Target Repository. |
| target   | Filter value representing the current Target Repository value.          |
| current  | Filter value representing the current Current Repository Value          |

## Example

Skip an update if the proposed change is HOLD and the current target repository is LIBR.

```
#  
# Skip an update if the proposed change is HOLD, the target Repository is  
# LIBR and the current is any.  
#  
AddSkipOnRepositoryChange("HOLD", "LIBR", "*");
```
