

# SetInitialRepository

Set the Current, Target and Scanned Repository value for newly added Volumes.

## Phase

This instruction is used by the TapeTrack Synchronization Engine.

## Syntax

```
SetInitialRepository(repository);
```

string *repository*;

repository	The initial Repository values for a new Volume.
------------	-------------------------------------------------

If the Media Type for the added Volume has an Initial Repository value set in its options, this value will override any value set by SetInitialRepository.

## Example

Set the initial Repository values to LIBR.

```
# Set the initial Repository values to LIBR.  
SetInitialRepository("LIBR");
```
