Move List

The move list displays all tapes currently in a move status including volume ID, current and target location, elapsed move time, scanned out status and whether the volume is overdue at its intended target.

Volumes can have their move revoked or cancelled by right clicking selected volumes and choosing Operations - Cancel Move

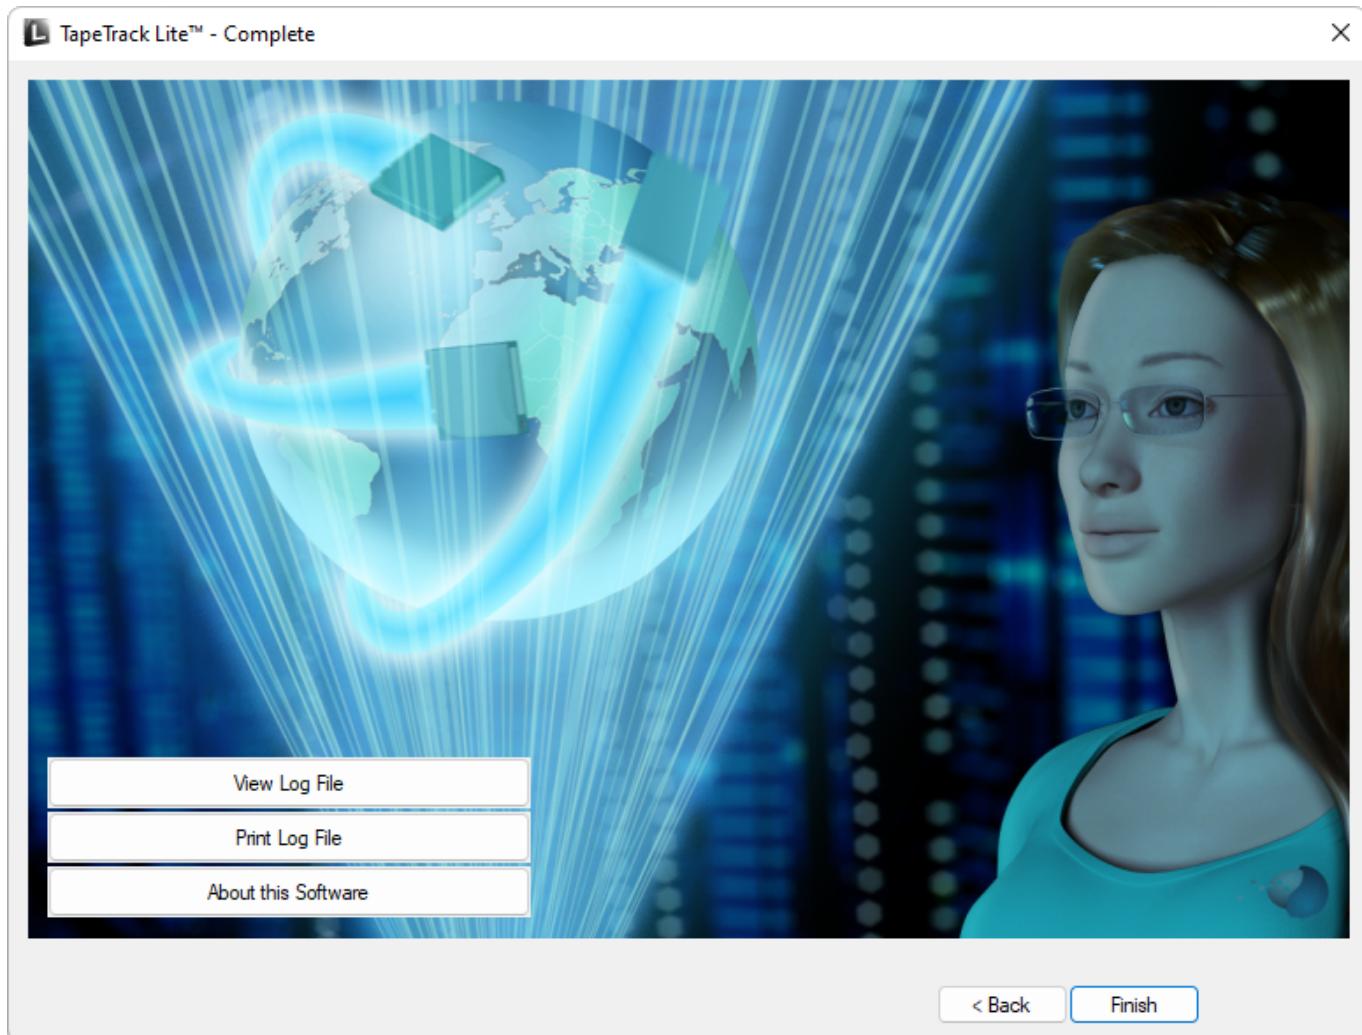

The screenshot shows the 'TapeTrack Lite™ - Move Lists' window. The window has a title bar and a main content area. The content area includes an 'Instructions' section with text about the move list screen and operations like canceling moves. Below this is a table with columns: Volume, Current, Target, Move Time, Scanned-Out, and Overdue. The table lists various volumes with their current locations (e.g., Offsite Vault, Library), target locations, move times, and status. A context menu is open over the first row, showing options like Edit, Export, Operations, and Cancel Move. The 'Cancel Move' option is highlighted with a blue box and a cursor. At the bottom of the window are buttons for Back, Next, and Cancel.
