Library Management

Overview

The TapeTrack Lite Library Management function allows you to manage individual libraries.

Video Walkthrough

Video coming soon.....

Steps

Select Library Management

Select Library Management from the Library Management Tasks drop-down menu.

Last update: 2025/01/21

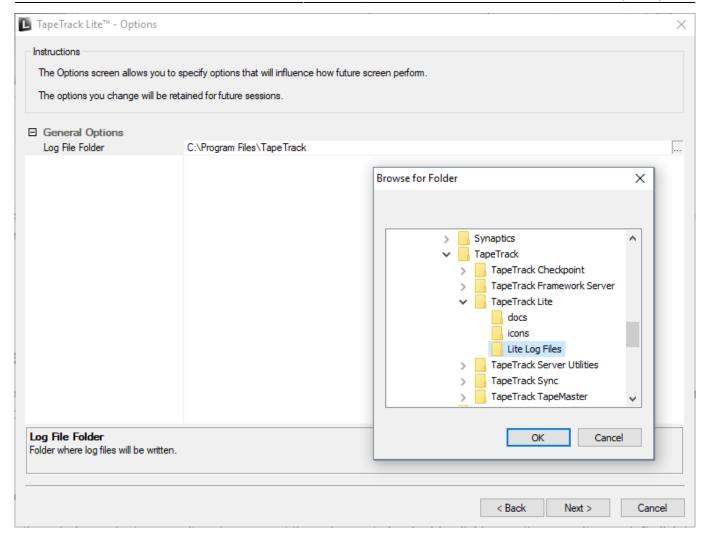

Options

This will open the Options window. If required you can set the location for the log files to be written to, or leave the default. To change the default directory, click in the right of the Log File Folder and click on the more options button (...) and select the preferred directory.

2025/12/01 08:09 5/8 Library Management

Repository Selection

Select the repository to manage by double clicking the required repository or by selecting the repository type and clicking Next

Volume Management

The volume management window displays volume and repository information including required moves to maintain the set level of scratch volumes.

Clicking execute will effect the displayed moves to manage the selected repository's management requirements. Closing this window will take you to the move list.

Notes:

- A Repository usage statistics.
- **B** Repository scratch requirements.
- **C** Free slots and current scratch volumes in repository.
- **D** Movement calculations required to hit scratch volume targets.
- **E** Target repository (required) for ejected tapes.
- **F** Volumes selected to move into repository.
- **G** Volumes to be ejected to create enough space for incoming volumes.

Move List

The move list displays all tapes currently in a move status including volume ID, current and target location, elapsed move time, scanned out status and whether the volume is overdue at its intended target.

Volumes can have their move revoked or canceled by right clicking selected volumes and choosing Operations → Cancel Move
