2025/12/01 08:15 1/7 Library Management

# **Library Management**

The TapeTrack Lite Library Management function allows you to manage individual libraries.

# **Library Management Process**

#### **Select Library Management**

Select Library Management from the Library Management Task's drop-down menu.

## **Options**

This will open the **Options** window. If required you can set the location for the log files to be written to, or leave the default.

To change the default directory, click in the field to the right of the Log File Folder, click on the more options button (...). From the **Browse For File** window select the preferred directory and click OK.

Last update: 2025/01/21 22:07

#### Click Next to continue.

Click Next button to continue.

#### **Customer Selection**

Select the Customer that you want to manage Volumes for by double-clicking the Customer-ID or left-clicking the Customer-ID and clicking Next at the bottom of the page.

2025/12/01 08:15 3/7 Library Management

#### **Media Selection**

Select the Media to manage Volumes by double-clicking the required Media or by selecting the Media and clicking Next

### **Repository Selection**

Select the Repository to manage by double-clicking the required Repository or by selecting the Repository and clicking Next

### **Volume Management**

The volume management window displays volume and repository information including required moves to maintain the set level of scratch volumes.

Clicking execute will effect the displayed moves to manage the selected repository's management requirements. Closing this window will take you to the move list.

#### **Notes:**

- A Repository usage statistics.
- **B** Repository scratch requirements.
- C Free slots and current scratch volumes in repository.
- **D** Movement calculations required to hit scratch volume targets.
- E Target repository (required) for ejected tapes.
- **F** Volumes selected to move into repository.
- **G** Volumes to be ejected to create enough space for incoming volumes.

#### **Move List**

The move list displays all tapes currently in a move status including volume ID, current and target location, elapsed move time, scanned out status and whether the volume is overdue at its intended target.

Volumes can have their move revoked or canceled by right-clicking selected volumes and choosing Operations → Cancel Move

### **Complete**

This will bring up the Complete window, from here you can

- Click Finish, Cancel or X to exit TapeTrack Lite
- Click Back to return to start menu and select another task
- Click View Log File to view the log
- Click Print Log File to print out log file for further reference
- Click About this Software to view product and support (email, phone & website) information
