2025/12/01 11:58 1/4 List

List

The List task allows you to build a list of volumes using a barcode scanner and then perform basic functions, such as adding tapes to your database or moving tapes to other repositories

List Process

Select List

Select List from the drop-down task menu and click Next to continue.

Set Options

This will open the **Options** window. If required you can set the location for the log files to be written to, or leave the default.

To change the default directory, click in the field to the right of the Log File Folder, click on the

more options button (...). From the **Browse For File** window select the preferred directory and click 0K.

Click Next to continue.

Scanning in Volumes

Scan the required Volume/s using your preferred scanning method.

Once the Volume/s have been entered close the **List Volumes Input** window by clicking the X in the top right corner to return to the **Scan To List** window. The **List Volumes Input** window can be reopened if required to enter more volumes by pressing F10 or clicking the Scanner Icon at the top left of the **Scan To List** window.

Select Volumes

Select required Volumes by:

- Left-clicking to select one Volume at a time.
- Using control + click to select multiple Volumes.

2025/12/01 11:58 3/4 List

- Using shift + click to select a range of Volumes.
- Right-clicking and selecting Select→Select All.
- Selecting Volume/s and then right-clicking and selecting Select→Invert selected.

List Right Click Options

Right click the highlighted Volumes and select from the menu options:

- Add new Volumes to Database: Adds any new Volumes to the TapeTrack database.
- Confirm at the Next Repository: Volumes will be moved, whether currently in a move status
 or not, to their next repository (based on next repository settings in TapeTrack TapeMaster) and
 confirmed.
- Expand Container Contents: Adds contents of Container to Volume list.
- Export
 - To File: Exports selected Volumes to text file. The report contains Customer ID, Media ID, Volume-ID, Current Location, Next Location, Container, Description and Message.
 - o To Email:
- **Refresh**: Refreshes the page to display the most up-to-date information. This can also be accomplished by pressing the F5 key.
- Select
 - Invert Selection: Inverts currently selected and non selected Volumes.
 - All: Selects all Volumes in list.

Clicking Ctrl + E will also open **Export** dialog to allow export to PDF, CSV, Excel, text or XML files

Click Next to continue.
