

Move Lists

The move lists displays all tapes currently in a move status including volume ID, current and target location, elapsed move time, scanned out status and whether the volume is overdue at its intended target.

Volumes can have their move revoked or canceled by right clicking selected volumes and choosing **Operations - Cancel Move**

The screenshot shows the 'TapeTrack Lite™ - Move Lists' window. It contains an 'Instructions' section and a table of tape volumes. A context menu is open over the first row, with 'Cancel Move' selected.
