Scanning-In

Overview

The TapeTrack Lite Scan In function allows you scan in volumes in a move status to the current repository.

TapeTrack Lite will only allow you to initiate the Scan-In task if there are tapes currently in an Incoming status.

Steps

Select Scan In

- 1. Select Scan-In from the Library Management Task's drop-down menu.
- 2. Once you have selected the required task, click Next to progress to the next screen.

Options

This will open the Options window. If required you can set the location for the log files to be written to, or leave the default. To change the default directory, click in the right of the Log File Folder and click on the more options button (...) and select the preferred directory.

Customer Selection

Select the account or customer that you want to manage tapes for by double-clicking the customer-ID or left-clicking the customer-ID and clicking Next at the bottom of the page to continue.

Notes:

- A Customer ID and description, Repository ID and description where volumes are being scanned in to.
- **B** The volumes to be scanned in.
- C Volumes scanned in.

Scan in the volumes using your preferred scanning method.

When all volumes are scanned in, close Scan-In Volumes window by clicking X at top right of the window.

Click Next on the Scan-In Volumes window to continue.

Complete

This will bring up the Complete window, from here you can

- Click Finish, Cancel or X to exit TapeTrack Lite
- Click Back to return to start menu and select another task
- Click View Log File to view the log
- Click Print Log File to print out log file for further reference
- Click About this Software to view product and support (email, phone & website)
