Scan-In

The TapeTrack Lite Scan In function allows you Scan-In Volumes in a move status to the Currently Selected Repository.

TapeTrack Lite will only allow you to initiate the Scan-In task if there are tapes currently in an incoming status.

Scan-In Process

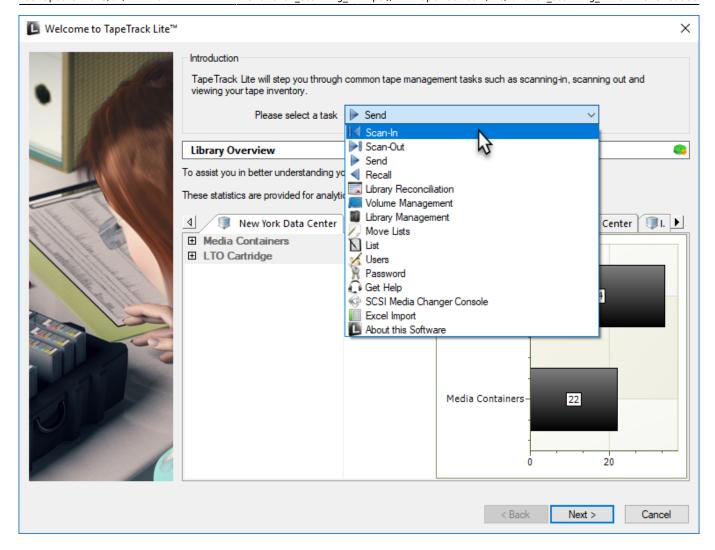

The Scan-In video is intended as a companion to the instructions.

Best results are obtained by reading the instructions and then viewing the implementation of the process via the video

Select Scan-In

Select Scan-In from the drop-down task menu and click Next to continue.

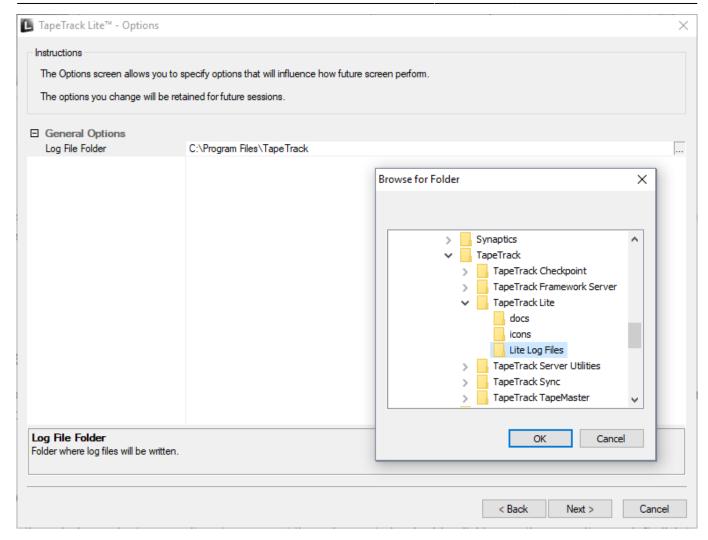

Options

This will open the **Options** window. If required you can set the location for the log files to be written to, or leave the default.

To change the default directory, click in the field to the right of the Log File Folder and click on the more options button (...) and select the preferred directory.

Scan In Volumes

This opens the **Scan-In Volumes** window and the input window. The **Scan-In Volume** window displays Customer, Media and Volume information.

Notes:

- A Customer ID and Description, Repository ID and Description where Volumes are being Scanned-In to.
- B The Volumes to be Scanned-In.
- C Volumes Scanned-In.

Scan-In the volumes using your preferred scanning method. Any scan errors are recorded in the Scan-In Log tab.

When all Volumes are Scanned-In, close **Scan-In Volumes** window by clicking X at top right of the window.

Click Next on the Scan-In Volumes window to continue.

Complete

This will bring up the **Complete** window, from here you can:

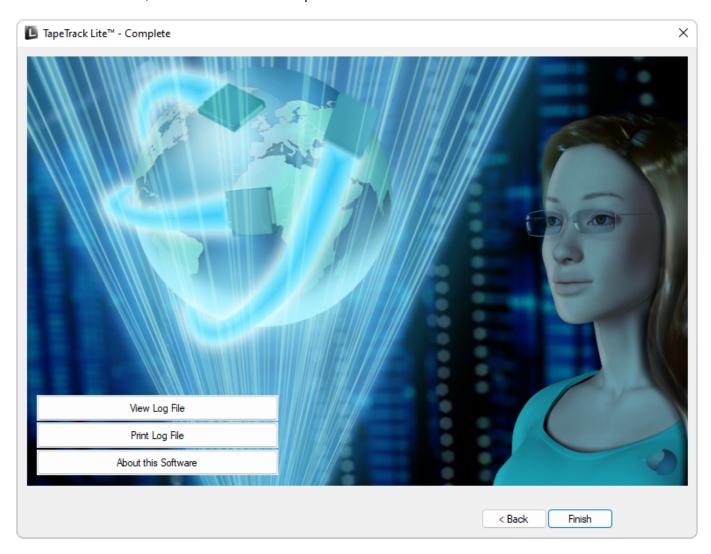

- Click View Log File to view the log.
- Click Print Log File to print out the log file for further reference.
- Click About this Software to view product and support (email, phone & website) information.
